VME COMPACT 50 TRANSITION F/X
(Free for the Kron and Prestige)

This package adds 50 new transitions in the form of alpha masks. Many of them are masks of actual objects, e.g., a champagne glass, etc. The patterns can also be used as backgrounds for Empty Scenes and with the Liquid Images and Video Spicerrack f/x, if installed.

To install, start up the Avio-Kron and go to the Systems Settings screen and select “Install Product”. Insert the SmartMedia card and select “VME Compact 50” then “License” and enter the VME50 unlock code for your Avio-Kron and select OK. That’s all there is.
