

# THE AVIO COMMANDMENTS

---

1. Thou shall use Y/C (S-vid) cables with connector barrels no longer or with ridges no higher than those that came with your Avio.
2. Thou shall remember to set the Avio's **output** to the type being used - Y/C or CVBS (composite)
3. Thou shall remember that only the **lower** SCART Y/C socket should be used for output.
4. Thou shall remember to set Image Size to Large on the Project Settings screen.
5. Thou shall **absolutely** assure Avio power during editing operations, preferably with an uninterruptible power supply (UPS).
6. Thou shall start video source playback before starting Avio recording, and stop Avio recording before stopping the video source playback.
7. Thou shall remember that rendered transitions shorten the video Sb and can affect audio synchronization if rendered **after** adding audio clips.
8. Thou shall remember that audio clips in the microphone track are subject to **removal** when making video Sb changes.
9. Thou shall remember to Undelete any desired video clips **before** changing projects.
10. Thou shall copy work in progress to master tape at regular intervals.
