

XDCAM TIMELAPSE

TO USE THIS TABLE
 (Use the "Units Code" at the bottom of the page to determine time units.)

1. Set Camcorder **INTERVAL TIME**
2. Set **NUMBER OF TIMES**
3. Read across from **INTERVAL TIME** column to the selected **NUMBER OF TIMES** column.
4. From the "discrete" columns (50-1000) read out the resulting playback time, or
4. From the **CONTINUOUS** columns read the playback time per unit record time.

NOTE: This table assumes 1-frame per interval time.
