## NEW WITH V3 SMARTEDIT (over V2)

### INSTALLATION

- ? Arabesk does not load with SmartEdit; it must be loaded separately from the Install Product screen (if doing a Full OS install).
- ? Allows unlimited size hard drives. (Using larger than 80GB hard drives on Avios, Prestiges, and standard Krons requires 256MB RAM.
- ? With Arabesk loaded, optional software can be loaded from a Casablanca-specific software CD.

### SYSTEM SETTINGS

- ? Individually selectable language for keyboard mapping and graphics (Avio Pro, Kron, Prestige only)
- ? Set current time/date function
- ? A timer-controlled auto-record function (like a VCR)
- ? Can delete optional software from Install Product screen

### PROJECT SETTINGS

- ? No MPEG setting
- ? Choice of 32 or 48KHz audio
- ? Choice of Deleting only Sb or everything recorded.
- ? Project selection list has indication of projects that have information in them.
- ? Progressive video selection for the 4:3 or 16:9 modes (Avio Pro, Kron, Prestige only)

### RECORD

- ? Audio volume level control during record (Kron and Prestige only)
- ? Delete button added (VGA mode only)

### EDIT SCREEN

- ? Storyboard playback can begin anywhere within a clip – us the "Range" button
- ? Info ("I") button by the storyboard – displays project name, starting position of clip, length of Sb, time remaining from start of clip
- ? Info ("I") button at Edit bin – displays absolute timecode of DV clips, Recorddate, Recordtime, Format (4:3/16:9), place for adding comments.
- ? Enhanced clipboard function (Avio Pro, Kron, Prestige only)
  - o Select clips from other projects without changing projects
  - o "Remove scene" function

- ? Trim clips directly in the storyboard using [STBD]-T (Powerkey only).
- ? Button on New and Special menus for filtering f/x.
- ? Can now use clips as short as one-frame on the Sb without inordinately slowing down operations.
- ? Split menu – “Time remaining” added (VGA mode only).

## TRANSITIONS

- ? Replacing a clip does not remove an in-place transition
- ? Transitions between adjacent inserts now possible
- ? **Instant Scene** (realtime f/x must be rendered) (Avio Pro, Kron, Prestige only)
- ? Auto-replacement of Sb clips and f/x with Scene made with Scene function (Avio Pro, Kron, Prestige only)  
**CAUTION:** When a newly created Scene is auto-placed on the Sb it is **NOT** added to the clip bin. Use the Sb Search button to add the clip to the clip bin.
- ? Full-frame preview now features an essentially real-time display (using slider) (Avio Pro, Kron, Prestige only)
- ? Button on New and Special menus for filtering f/x.

## IMAGE PROCESSING

- ? **Instant Scene** (realtime f/x must be rendered) (Avio Pro, Kron, Prestige only)
- ? Full-frame preview now features an essentially real-time display (using slider) (Avio Pro, Kron, Prestige only)
- ? Button on New and Special menus for filtering f/x.

## TITLER

- ? **Instant Scene** (realtime f/x must be rendered) (Avio Pro, Kron, Prestige only)
- ? Box option additions
  - o Copy font to all lines
  - o Copy style to all lines
- ? Full-frame preview now features an essentially real-time display (using slider) (Avio Pro, Kron, Prestige only)
- ? Button on New and Special menus for filtering f/x.

## AUDIO RECORD

- ? CD record has its own Record button next to audio record button
- ? Audio level slider now active for DV input
- ? Special menu
  - o 5.0 surround processing
- ? Enhanced clipboard function (Avio Pro, Kron, Prestige only)
  - o Select clips from other projects without changing projects
  - o “Remove scene” from clipboard function
- ? "Stereo B" setting for recording second 32KHz stereo channels

- ? Button on New and Special menus for filtering f/x.

## AUDIO MIX

- ? Timeline screen
  - o Has slider control
  - o Has Fade button
  - o Has Envelope button
- ? Fade menu
  - o Variable Fade time up to 25 secs
  - o 1-button selection of 1/2, 1, 2, 5, & 10 sec fades
- ? Envelope menu
  - o Waveform of selected clip
  - o Add (control points) button
  - o Remove (control points) button
  - o Block button for range playback selection
  - o Master slider for moving between control points
  - o Can set adjustment of control points by "click and drag" or slider
  - o Slider for frame-precise movement of control point between adjacent control points
  - o Range button
  - o Play button with audio level bars
- ? Effects menu for applying f/x to audio clips from Mix screen
  - o F/x list
  - o Insert/change button
  - o Remove button
  - o Archive button
  - o Button for filtering f/x.
  - o Audio clips with added f/x have fx symbol overlay

## FINISH

- ? Color bars presented during record out via Firewire (rather than gray screen).
- ? Edited anamorphic video output to DV vtr's via Firewire works properly during transitions or other f/x.
- ? When recording to DV without "DV-Recorder Controls", the DV recorder will not be controlled by Casablanca.
